----NOTE: SPECIAL PRICE FOR MYCOTAXON SUBSCRIBERS ONLY: \$59.00----

Edited by Richard P. Korf, with a foreword by Teng's daughter, Rosaline Z. Deng. The text was written in English and revised up until 1966, and is now available for the first time in that language (an earlier, much abbreviated draft was translated into Chinese and published in 1963).

What reviewers have to say about Teng's *Fungi of China*:

"... one of the most valuable books on the fungi of China ever published in English." -*Mycologia* 90: 1091-1092. 1998.

"... a great big blue uncompromising brick of a book ... an instant classic. Anyone interested in identification of fungi, particularly in Asia, should get this book immediately. Mycology owes another debt to Dick Korf for his sympathetic and intelligent editing of this superb work." -*Bibliography of Systematic Mycology* 10(6): xlviii-xlix. 1998.

"The publication of Teng's work now gives taxonomists easy access to the contributions of this remarkable scientist without having to undertake a fastidious searching in libraries." -*Sydowia* 48: 277-278. 1997.

"The book is important for any researcher interested in the systematic relationships, diversity, and distribution of fungi on a global scale." - *New Zealand Journal of Botany* 35: 265-266. 1977.

"An extensive index to all taxa ... makes this book readily accessible to the user. It should be present in every public and private mycological library." - *Persoonia* 16: 424. 1997.

A MONOGRAPH OF THE FUNGUS GENUS *CERCOSPORA*, by Charles Chupp. Published by the author, Ithaca. 1953. Hardbound, 667 pp. 222 illustrations, octavo. \$25.00 by surface mail, \$45.00 by air mail. (No ISBN.)

Despite the passage of the years, this volume, providing descriptions, line drawings, and keys to over 1800 species and synonyms of *Cercospora*, remains an essential reference resource for anyone working on the genus or its many recent splits. Unsold copies were saved from destruction by Mycotaxon, Ltd. Proceeds from sales go to the Chupp family.
