**Abstract**—Species of *Pluteus* reported from the Iberian Peninsula (Spain, Portugal) and Balearic Islands (Spain) are listed, with data on their distribution, ecology and phenology. For each taxon a list of all collections examined and a map of its distribution is given. According to our revision 33 taxa of *Pluteus* occur in the area.

**Key words**—*Pluteaceae*, biodiversity

### Introduction

*Pluteus* Fr. is the type genus of the family *Pluteaceae* Kotl. & Pouzar (*Agaricales*, *Basidiomycota*). Its main characteristics are the pluteoid basidiomes (i.e. free lamellae; context of pileus and stipe discontinuous), pink spores and inverse lamellae trama. It comprises about 300 species (Kirk et al. 2001) and is distributed in all continents except Antarctica (Singer 1986).

Monographic studies in the genus had been carried out in Europe (Kühner & Romagnesi 1956, Orton 1986, Vellinga 1990) North America (Smith & Stunz 1958, Homola 1972, Banerjee & Sundberg 1995) and South America (Singer 1958, 1961). A worldwide monographic approach was published by Singer (1956).

In the Iberian Peninsula (Spain and Portugal) and Balearic Islands (Spain) the records of *Pluteus* are often included in general checklists. Prior to our study the only monographic paper on this genus was an article by Muñoz-Sánchez (1991), dealing with species of section *Pluteus*, mainly based on collections from the Basque Country (northern Spain). Regional studies on *Pluteus* within the Iberian Peninsula have been published in recent years, as part of the Flora Mycologica Iberica project (Justo & Castro 2004; Justo et al. 2005a, b, 2006).

We present a catalogue of the 33 taxa of *Pluteus* recorded in the Iberian Peninsula and Balearic Islands. For each taxon the following information is given: a list of all collections examined, a map of its distribution in our area and some brief comments on its ecology and phenology.

### Collections examined

We have studied the collections gathered by members of the Mycology Lab at Vigo University between 1991 and 2006. Collections of *Pluteus* deposited in the Iberian official herbaria (AH, ARAN, COFC-F; GDA-GDAC; JACUSSTA; LEB; LOU-Fungi; MA-Fungi) have been revised. Personal herbaria, from independent mycologists and associations, have also been revised and are listed and abbreviated as follows: Agustín Caballero (ACAB); Asociación Micológica de Barakaldo (Barakaldo); Associação Micológica A Pantorra (AMP); Carlos Hermosilla (CEH); Centro de Estudios Forestales de Valonsadero (VALON); Francisco Tejedor (PT); Josep Leonard Siquier (JLS); Luis Alberto Parra (LAP); Societat Catalana de Micologia (SCAT).

### Distribution data

The provinces of the Iberian Peninsula and Balearic Islands are shown in fig. 1. Abbreviations for province names are given in table 1.

For each taxon a distribution map is given, containing the following information:

**Grey provinces:** collections of this taxon from these provinces have been studied.

**Provinces indicated by a dot:** bibliographic references about the occurrence of the taxon in the area exist, but no collections have been studied.

**Provinces with letter “D” (doubtful):** bibliographic references about the occurrence of the taxon in the area exist, but possibly they do not correspond to the taxon or, at least, to our taxonomic concept.

Full bibliographic references of all taxa will be published in the ongoing monographic series “Cuadernos de Flora Micológica Ibérica” (Pando et al., 1990, Parra 2006) that contains references of all groups being studied within the *Flora Mycologia Iberica* project.

### Catalogue

The catalogue is arranged according to the subdivision of the genus by Vellinga & Schreurs (1985), and alphabetically within each (sub-)section. Taxonomic concepts are the same as the ones presented by Vellinga (1990). If our taxonomic concept differs from the one in that work, or if the species is not treated there, additional references are given.

## Section *Pluteus*

### 1. *Pluteus atromarginatus* (Singer) Kühner, Bull. Mens. Soc. Linn. Lyon 4: 51. 1935

On coniferous wood (*Pinus*).

Fruiting from late summer (August) to winter (February), but more commonly recorded during autumn (October-December).

**Collections examined**—**SPAIN: A Coruña:** Santiago de Compostela, on *Pinus pinaster* wood, 19.I.1986, L. Freire & M. Castro, LOU-Fungi 2709; Corcubión, Finisterre, *Pinus* forest, 3.XI.1983, L. ### 2. *Pluteus atropungens* A.H. Sm. & Bartelli, *Michigan Botanist* 4: 60. 1965

On wood of broad-leaved trees (*Populus*).

Fruiting during autumn (October-November).

For a full description and comments see Justo & Castro (2007a).

**Collections examined**—**SPAIN: Ávila:** Peguerinos, on unidentified wood of broad-leaved tree, 24.X.1976, F.D. Calonge, MA-Fungi 4633; **Valladolid:** Laguna de Duero, on *Populus* stump, 19.XI.1994, A. García-Blanco & al., MA-Fungi 54269.

**3. *Pluteus brunneidiscus*** Murrill, N. Amer. Fl. 10: 131. 1917

On wood of broad-leaved trees (*Fagus*, *Quercus*).

Fruiting during the Summer (June) or Autumn (November).

For a full description and discussion on the synonymy see Justo & Castro (2007a)

**Collections examined**—**SPAIN: Huelva:** Aracena, La Galbana, in mixed *Quercus ilex* subsp. *ballota* & *Quercus suber* forest, on wood, 8.XI.2003, L. Romero de la Osa, JA-CUSSTA 3069; **Navarra:** Donamaría, on *Fagus sylvatica* wood, 11.VII.1999, J.M. Lekuona, ARAN 5006001.

**4. *Pluteus brunneoradiatus*** Bonnard, Mycol. Helvetica 2: 141. 1987

On wood of broad-leaved trees (*Alnus*)

Recorded in April

For comments on this species see Justo & al. (2007)

**Collections examined**—**SPAIN: Sevilla:** Cazalla de la Sierra, Río Rivera de Hueznar (Alanís), on *Alnus glutinosa* wood, 2.IV.2003, J. Mariñas & N. Rodríguez-Ramos, COFC-F 2978.

**5. *Pluteus cervinus*** (Schaeff.) P. Kumm., Führer Pilzk.: 138. 1871

On wood of broad-leaved trees (*Quercus*, *Fagus*, *Eucalyptus*, *Alnus*; *Betula*, *Ulmus*), very rarely on coniferous wood (*Pinus*) or terrestrial.

Fruiting mostly during autumn and winter (October-February), although it may be found all over the year.

**Collections examined**—**SPAIN: A Coruña:** Betanzos, Chelo, on *Quercus* wood, 8.IX.2004, A. Justo, LOU-Fungi 18718; Santiago de Compostela, on unidentified stump, 7.I.2002, J.
