

Rat El Verde Field Station PR 19.2.98
11.3.

3/98

16.3 Pyrenium black Chaetomium few short erect, rough
hairs.

Overgrown by Dicranod and penicillium

19.3

22.3 Chaetomium

Sporosmiella 4 ERZ Asc 84 x 13 hirsute

24-27.3-
Spores 24.1 x 6

psuedotelia ca 180-190 diam dregard germ slit
between miniae & inopropriae [- wrong ascus shape for
up acc to Cain + Ahmed]

probably small ed of miniae race ✓

28.3

Phycomyces Spores mostly evenly
ellipsoid cov 13 x 6.5

Columnella 145 tall x 100 diam. slightly tapered
to base but ± quad. ✓ Dialyptera

31.3

Leckellaceae grows on penicillium? conical.
yellow. neurosporia ca 7.5 x 3-2.5 / sacra.

C. leveke ✓

Spores bracts 5-6 umbellate 27 long
5 sepals

Sporangia
around
each branch

7.4

Dried

7.4

good

C. ventosa

Chaetoma

rough straight hairs below
head of why hairs absent

Spores 7.5 x 5 micrometers

Asci clavate.

Dried 7.4
