

11.3

16.3 Ascobolus immersus 29 x 4, hairy

Ascobolus immersus 55 x 32.

Podospira Spores 33-32 x 19.5

19.3 Sarcobolus Spore mass 48 x 18 (4 x 2)

Spores 19.5 x 9.5 CI truncate. smooth

imm perithecia - some glabrous, some hairy

23.3 - still developing

25.3 Podospira Spores with radiating  
fibrils all around, with  
appendage at apex. large, small, decipiens-type

8-spored 35-38.5 x 25.7

Imm asci 240 long

truncate - basal 14 app.

Young spores cylindrical

perithecia immersed - neck 165 long black.

825 overall height x 410 from truncate

to base

P. immersa?

28.3

Podospira large by appendage.

e.g. 100 x 50 →

77x16

3.3 Penicillium

550 x 275 red 200  
825 x 550 200

Asci 68 diam Spores biserial  
8 spores -74 x ca 280-290 long.  
33- x 25  
Spores 41.7 x 22.5

ly apperage wt visible an discharged  
spores

5.4

P. imense ✓ abundant some aberrant

Spores which have pointed before  
dist of body & ly app? ca 58x19  
- clavate.

8.4

Asp. small 200 diam. yellowish.

Sp. 10-11 x 6.5 ellipsoid hyaline biserial

Asci 65 x 16-18 clavate, sl. tapered below  
excipulum of paraphyses cells.

Peras hyaline, some forked, wt capitate  
2-3

Capitatus sp.

Pitobas kleini Spangm ✓

11.4

abundant 'P. immersa'

16.4

abundant P. immersa

Some antts hairy

apical germ pore i.e. opposite end to large appedage.

1.5

Young Coprinus?

Saccobas yellow 4x2 Spore walls 39 x 17

shortening to rounded walls 32 x 19

Spores smooth 16 x 8

truncates ✓

White Coprinus S. sp. 9.5-11 x 6.5 basinate

Asci cyl/clavate ca 65 x 12-13

leaving to stick together out of asci. (?)

Pores not obvious

cf Lactaria / graniformis

K1 -ve

best fits graniformis

7.5

Coprinus stercorarius ✓

best of Lactaria not here present in (Carrion) Spores

P. immersa

Some hairy (lightly brown) others

not.

by apps hardly ever seen

when Spores are free

Another Dodospore - long neck, larger spores?

11.5 Cop. cardspurs ✓ Sp. minima ✓

P. imense

8-spined spurs, all with good

ly appedages one 115 x 17

rather 71 long

Spines 45 x 22.5

48.2 x 27.3

number, size &

shape varies quite a lot.

14.5

Cop. cardspurs ✓

Cop. straggers ✓

Sp. minima ✓

P. imense

ly apps 103, 87, 93, 80

Pod communis

ly app

29-32 x 5

245 4 at apex  
of spur ly app

29-35.5 x 19-19.5

communis

lightly hairy, slightly waxy at neck

Dried 14.5

Plenty of good

P. communis
