

Pae? Moufion?

Sommel. Herault. Fr 23. 4. 98

23/98

incubated 26.4.98

2° 58' 02" E 43° 36' 40" N

28.4. Pibaira ellipsoid much up to 9.5-11.2 x 6-6.5

1.5 1mm pectica - abundant, with sweeping mycelium maeani

Pilobus robust, with yellow/orange spores

7-6 x 4

Umbonatus

4.5 Pectica with white hair and white

imm. Cercophora?

imm Sordaria on paper from abundant sweeping mycelium

of 1.5

7.5 Pil. umbonatus

Sordaria

22.5 x 10.3

good death- glucina

? Cercophora

pecticed wall like Sordaria - nothing inside yet

white hairiness proximal.

11.5 Corp hairy brown sclerotium? ca 4 um

Sordaria with white mycelium covering all of pectica except side. spores very ellipsoid purple

22.5 x 16.1

-24

Papillate. Shell distinct for v. thin

humana

14.5 Black spherical cleistothecia?
spores black 18 x 11 cf Sordaria?

Ascothia imbricata imm poor cordia spores
ca 51 x 29.

Sordaria 22.5 x 10.2
20 x 9.6
22.5 x 9.6. alcina

18.5 Cop hepturnos coming?

being overgrown by saline orange/red
Vestricillium / Acrostalagus Spores ca 5 x 2

Sordaria Superficial white vestiture all
are emergent part of perithecia
Spores 23-25.7 x 14.8-15.5 very thin
sheath, not smelly in H₂O Wenona

21.5

27.5

Overlaid by Vest/Aci

Done 27.5
