

3.11 T. rocheti hispida ✓ 25-26 x 9.5
Sarcobolus hispida ✓ 51.5 x 19 rough.
 Spores 20 x 8 not truncate. Asci 150 x 50

4.11 Cercophora very dark carbonaceous perithecia
 ascus sphere ca 4.5-5 diam
 mature spores in ascus - dark body 18-16 x 7.7
 hyaline spores 4.5 x 4.5-5, appressed, uniaxial
 length ca 30 & 20

Brown filiform hairs but not
 tan base basal longer
Sporangia 8 celled 4.5-5 x 6.5

diagonal g. slit, casketed @ middle septum
Deportis

inner layer of filiform cells, other parenchymatous/rounded
Anisura?

7.11 5 4 10 14 white Coprus ca 250 diam
 Asci 80-90 x 25 8-sp ellipsoid truncate 12.5-13 x 8-9
 Paras not distinct

Cerc. anisura lightly brown hairy sp. 1 of ~~quadricornis~~?

T. hispida

Actinon 8-sp. 41-45 x 22.5 ✓ Setae but simple
 appressed to setae of hairs? mentax
 spores symmetrical ellipsoid

11.11

C. proles white, small

(?)

~~Helicoverpa~~

Asci broad clavate 75-80 x 24 stalk stalked

Spores 8, bisseriate hyaline ellipsoid 12.5-13 x 8

Paras hooked, st. clavate to 3. 10-16

T. bisporula 29 x 9.5

Sp. bisporula

Arminium 41.7 x 22.5 medax

15.11 Sacc. versicolor

Cerc. anisura

20.11 Cercophora

T. bisporula

22.11 Cerc. anisura

24.11 4-spored
gel epidermis/veil

Stroph/Con.

no paras?

Spores ellipsoid 14.5 x 6.5

antral g.p. brown?

Cercophora anisura

marginal cystidia

sl. capitate hbr just

lytta fur

26.11 T. bisporula

Arminium medax

Conocybe (Pithecia) conopsea

30.11 Arminium medax

Cercophora

spores 30 x 15

4.12

Cercophora

Conocybe

19.5 x 16 x 8

Setae to 52.

no asci hbr

probably 8-sp / scutiger ?

Hertz

Doratiaceae

hypha

conical 110-150, septate

swollen at base.

4-5 dark intercalary cells distal ones pale.

Spores 

35.5-45 x 5.5

6.12 Arriom nexda

T. bispinosa 24 x 85

9.12 fragments of Sp. intermedia spores ✓

14.12 3 4

T. bispinosa

19.12 T. bispinosa

Spores 14-13 x 5

setae typical, septate up to 130 long

unbranched asci ca. 110-120 x 9-10 ✓

= microscopic

Cercophora new growth? fairly hairy

apical cells spore head end 10

distal end 23 ✓

27.12

T. bispinosa ✓

Spores 24 x 9
